Building People Who Build Great Things

Washington's Department of Labor and Industries recently announced that Apollo's Experience Modification Rate is .33, making Apollo Sheet Metal and Apollo Inc. the safest contractors in Washington State; and the second safest companies in Washington next to Enterprise Rental Car. Apollo is extremely proud of this achievement. Apollo prides itself on the mission statement "Building People Who Build Great Things" and an EMR of .33 makes us proud to know that Apollo is taking care of its employees. Since 2003, Apollo Sheet Metal and Apollo Inc. have made a concerted effort from the top down to forge an Injury Free work environment on every job we do. If our employees are part of our mission and vision, then our employees *will* go home safe every day.

Something like this can only be accomplished by a group effort that extends company wide. This is the kind of grand scale team work that Apollo has always been about, the kind that has always made Apollo successful, and now the kind of teamwork that saves lives and brings everyone home safe.
